Professional Experience

Senior AI Research Scientist

DZYNE TECHNOLOGIES INC.

2021-Present

Fairfax, VA

- Established organization-wide AI-assisted development capabilities by architecting an AI orchestration platform integrating LLMs (Anthropic, Gemini) via OpenCode.
- Delivered a semantic video search and playback application with timestamped protobuf metadata by engineering autonomous agentic workflows for code generation.
- Developed multimodal fusion models on 5TB of videos for a multi-org initiative (Rutgers, WashU, UKy); boosting F1 from 52% to 75% and securing \$500k in follow-on for \$2.3M program (WACV [1]).
- Designed a multimodal transformer with contextual representations for traffic modeling; exceeding the prior state-of-the-art (SOTA) by 7% (ECCV [2]).
- Automated multi-resolution image processing and dataset construction (> 100k samples), resulting in a \$1M extension after achieving 78% segmentation F1.
- Co-led 9 proposal efforts across an 11-person team; securing \$3M to support AI R&D.
- Developed a generative approach for segmentation super-resolution that reached 88% accuracy (WACV [3]).

AI Research Scientist

JOHNS HOPKINS UNIVERSITY APPLIED PHYSICS LAB

2020-2021

Laurel, MD

- Trained and deployed vision models at scale (Docker/Dask/Slurm) for the Climate Trace initiative; delivered CO₂ emissions estimates at global scale via Microsoft Planetary Computer (CVPRW [10]).
- Developed adversarial de-biasing techniques to improve AI fairness in medical data/imaging applications by 20% (MICCAI [4], Neural Computation [9]).
- Optimized multi-agent swarm control; reduced cooperative capture time by 25s for multiple rewards (Array [8], ISEC [5]).
- Designed a CUDA kernel for hierarchical video object detection; increased classification specificity under tight latency.

Research Assistant

UNIVERSITY OF KENTUCKY COMPUTER VISION LAB

2017-2020

Lexington, KY

- Built a multimodal dataset (LiDAR, imagery) and architecture that outperformed the prior SOTA by 13% (CVPRW [11]).
- Designed NLP models to forecast company performance based on financial text filings, and benchmarked on evaluation pipelines.
- Led the development of a safety-focused, perception-driven, navigation system (WACV [7]).
- Collaborated with CDC, UNHCR, and IOM on population estimation for resource allocation, reducing error to 7% (IGARSS [6]).

Software Development Engineer

BELCAN ENGINEERING GROUP INC.

2015-2018

Lexington, KY

- Automated jet engine diagnostics in C/C++, saving \$100k by developing a diagnostic and fault resolution system.
- Streamlined a legacy C++/Make cross-platform building system, reducing development and compilation time by 60%.

Projects

Personal Project

CharacterSheet: Agentic Character Design

2024-Present

- Developed a production-ready Generative AI application ([GitHub Repository](#)) that transforms single character reference images into 6-component model sheets by integrating LangGraph, FastAPI, and Google Gemini 3.1 Flash Image.
- Enabled iterative, user-guided asset customization by engineering an interactive chatbot interface for the image generation pipeline.

Technical Skills

Languages	Python, C/C++, Java, Verilog, $\LaTeX$, Shell
AI/ML	PyTorch, Keras, BoTorch, Multimodal Transformers, LLMs, Agentic AI (LangGraph), Reinforcement Learning
Computer Vision	Generative AI, Segmentation, 3D Vision, Localization, Pose, Depth, Remote Sensing
Infrastructure	AI Orchestration, FastAPI, Data Processing, Distributed Training, Slurm, Docker, AWS

Education

University of Kentucky

Master of Science in Computer Science, GPA – 4.0, Outstanding MS Student Award

2018-2020

Advisor: Nathan Jacobs

University of Kentucky

Bachelor of Science in Computer Engineering, GPA – 3.8

2016

Magna Cum Laude

University of Kentucky

Bachelor of Science in Electrical Engineering, GPA – 3.8

2009-2013

Magna Cum Laude

Service & Recognition

- Best Paper ISEC 2022 and CVPRW EARTHVISION 2021; Outstanding Reviewer CVPR 2024 & 2025.
- Reviewer 2022-2026: CVPR, ECCV, ICCV, ICLR, NeurIPS, WACV, and CVPRW EARTHVISION.
